

DO YOU HAVE THIS ON YOUR FRONT LAWN?

The Town is marking curbstops as part of the Asset Management Plan (AM Plan). A young fellow will be coming around in July and GIS mapping each curbstop, all watermain valves, manholes, hydrants, sidewalks & signs. This information will be an additional tool for supporting communication, long-term financial planning, and cataloguing information using a web-based GIS platform.

This project is part of a larger Group Learning Initiative with WaterWolf communities and will be paid for by grant funding from the Federation of Canadian Municipalities (FCM) Municipal Asset Management Program (MAMP) and the Gas Tax Fund.

Please try to keep these spots visible when cutting your grass!

Thank you for your support for this project.
